20 Sept 54

1953 [ ] [ ] Pring Rpt

54. [ ] (Plan LABAZE, Subject's designator for the Source is "CARLINO".) Following the re-emergence of Karl HASS in Rome and his activation as the liaison link in Rome between [ ] and the new German service which was first dominated by Colonel BEINZ, this Source came to life again. For a considerable period of time the operation was most active, and then following higher level changes in the German service, the role of HASS appeared to become secondary. Subject achieved a real triumph of C. E. operations, when the unscrupulous HASS went into the Soviet Commercial Delegation to offer his services (his entrance and exit were surveilled). [ ] was even subsequently to act as his link with the Soviets!
55. Unfortunately, during the period of [ ] schooling, from the end of April 1954 to early July 1954, the contact with [ ] has had to lapse, because the Source would not readily accept the control of the new temporary case officer, Captain DE PORCELLILIS, and most developments would have to await [ ] full return to the saddle. The channel used here has also revealed that [ ] comes under the special sub-Center (Sotto Centro Speciale) and that DE PORCELLILIS had been brought in to act as the chief of this sub-center under Subject, although Subject has normally run this group personally.
